

Student Matric:	D	0	3						
Lab Session Date:		May, 2025		Section			Group		

Fill in your details, **complete** this test, **return** this question paper AND **upload** your C# solution to uLearn

Your tasks:

In Visual Studio 2026 Community Edition, create a Windows Forms App (.NET Framework) project named [**YourMatricNumber**].

The Admiral Homestay main form should closely resemble Figure 1:
(you can choose any appropriate image)

Admiral Homestay : Main Form

ADMIRAL
HOMESTAY

Name ☐ Non-Malaysian

Address

Contact Number

Car Plate Number

Next

Figure 1: Admiral Homestay main form

Details for name, address and contact number must be filled out before button Next is clicked (Car plate number is optional); otherwise, a reminder message appears as shown in Figure 2:

Admiral Homestay : Main Form

ADMIRAL
HOMESTAY

Name Arlene ☐ Non-Malaysian

Address

Contact Number

Car Plate Number

Next

Error

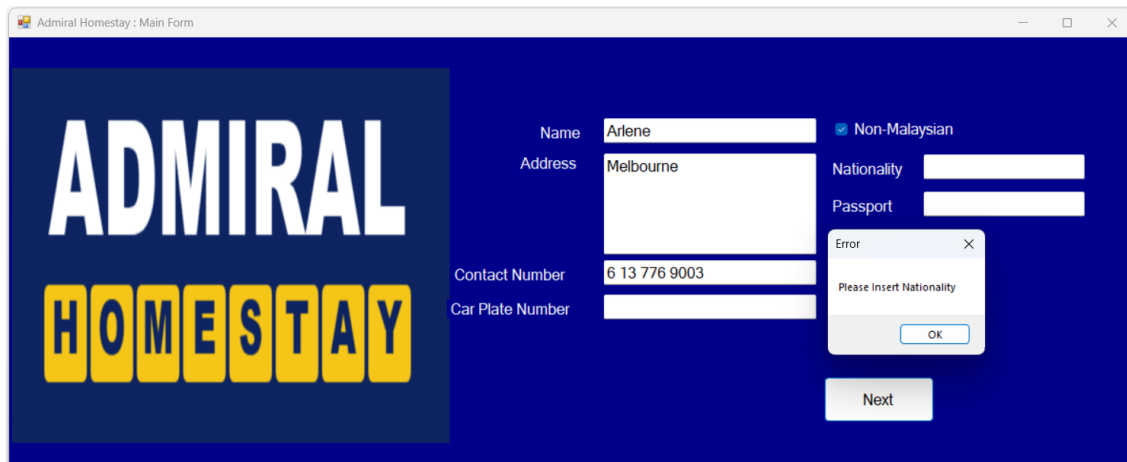

Please Insert Address

OK

Figure 2: Reminder message to enter name, address and contact number.

If the Non-Malaysian checkbox is checked, the label and text boxes for Nationality and Passport appear.

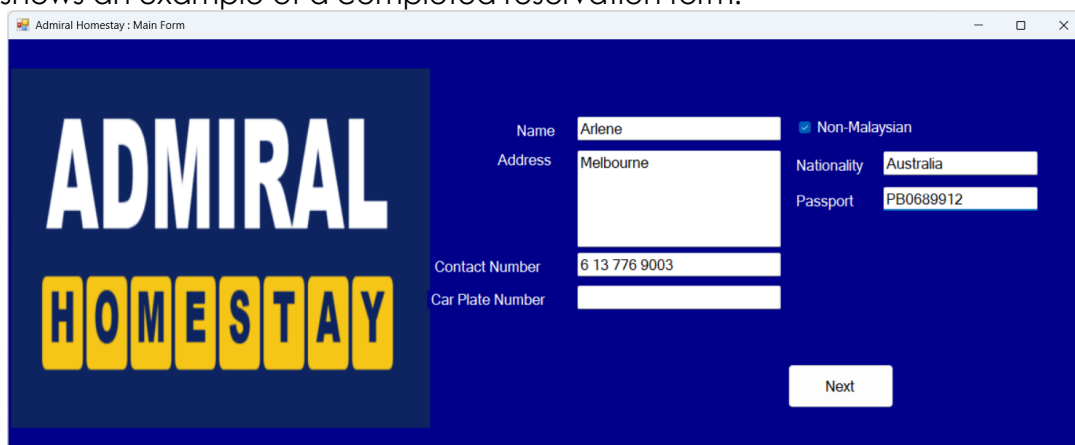

Similarly, details for nationality and passport must be filled before the Next button can be clicked; otherwise, a reminding message appears as shown in Figure 3:

The screenshot shows the 'Admiral Homestay : Main Form' window. On the left is the 'ADMIRAL HOMESTAY' logo. The form fields are: Name (Arlene), Address (Melbourne), Contact Number (6 13 776 9003), and Car Plate Number (empty). The 'Non-Malaysian' checkbox is checked. To the right of these fields are input boxes for Nationality and Passport, which are currently empty. An 'Error' dialog box is displayed in the center-right, with the message 'Please Insert Nationality' and an 'OK' button. A 'Next' button is located at the bottom right of the form.

Figure 3: Reminder message to enter nationality and passport number.

Figure 4: shows an example of a completed reservation form.

The screenshot shows the 'Admiral Homestay : Main Form' window with the same fields as Figure 3. The 'Nationality' field is now filled with 'Australia' and the 'Passport' field is filled with 'PB0689912'. The 'Next' button is still present at the bottom right.

Figure 4 Example of a completed reservation form

When the Next button is clicked, another form [FormReservation] is displayed with all the customer's details as shown in Figure 5:

Customer's details from previous form.

Customers need to select Check-in and Check-out dates.

Arline
Melbourne
6 13 776 9003
Australia

Date Start Monday , 27 April , 2026

Date Return Thursday , 30 April , 2026

4 days

Daily Rental Rate, RM 550.00

Total Amount, RM RM2,200.00

< Previous Homestay 2 Next >

Figure 5 Form Reservation with homestay picture, name and daily rate

Buttons Previous and Next when clicked, shows :
A homestay picture
A homestay name
A homestay daily rate

Arline
Melbourne
6 13 776 9003
Australia

Date Start Monday , 27 April , 2026

Date Return Thursday , 30 April , 2026

4 days

Daily Rental Rate, RM 550.00

Total Amount, RM RM2,200.00

< Previous Homestay 2 Next >

Finally, when the button Total Amount, RM is clicked, the numbers of days is displayed with the total amount:

Total amount = room rate * days

Submission guide:

Normally, your C# folders and files are in:

C: Users > [username] > source > repos > [project folder]

To submit to uLearn*:

Item	Description / instruction
1.	Completed question paper (matric number, date, SG)
2.	Executable (.exe) file [project folder] > bin > Debug >
3.	a. Screen shot of both forms. Copy & paste the screen shots b. C sharp program file (.cs) [project folder] <Form1>.cs <Form2>.cs Copy & paste the codes Combine a and b into a Word document and save as .pdf

*if you are unable to submit to uLearn, email your submission to **razak@utem.edu.my**
